

WIRELESS INTERCOM SYSTEMS

Comstar full duplex wireless are designed specifically for production teams that need instantaneous, "hands free" voice communications. These revolutionary intercoms are not voice activated and there is no delay when transmitting. The system enhances jobsite productivity and safety by allowing up to eight users to talk simultaneously just like on a regular telephone. Outstanding range - digital - full duplex voice - expandable (start small, add field programmable headsets up to 8 total) - total portable - simple/instant setup - no license required.

Comstar "all-in-one" duplex headsets feature miniaturized wireless circuitry and antenna built into the earcup. This provides easy operation as well as outstanding full duplex communications. No belt-pack required. Only 400gr.

COMPAK Lightweight belt-pack

COMPAK belt-packs allow users to select the best headset accessory for their specific application. This is an outstanding benefit for production teams. CC-800li (Rech. battery) : € 39
