FCC & CE certificated

Wireless Radio Firing System. FSK Modulation, excellent antijam performance, far more sensitive, reliable.

- Include a 12CH Individual Firing Transmitter A and 12 firing modules with a carrying case, each button works with its correlative module separately.
- With Learning Button in the firing module, can change remote / cue or clear stored code easily. Convenient when system needs to be reset.
- Advanced output solution, never worried of short in the firing module. If you use required 4x AAA battery to power the module, even when the output terminals are shorted, the module will not be damaged. Long range 200m. Remote comes with ON-OFF switch, Low Power indicator.
- 3-position switch for TEST, ARM and power OFF, Low power indicator tells you when batteries need to be replaced. Complete functions, easy to be used.
- Compact and elegant. FCC/CE certified, with FCC and CE certificates.

12 Q pro (individual) : € 229,90 | 12QS pro (individual + interval) : € 249,90

CE

MS32Q

- FSK Modulation, range 200m, and excellent antijam performance, sensitive, reliable. Great features will bring you wonderful experience, even other firing systems were not able to work then MS32Q can still work when there is mass interference signal around.
- Advanced Overload Protection to ensure the firing module will not burn. The system is solid like a rock and can be used year and year to save your money!
- Reverse Protection prevents damage from any accidental incorrect wiring.
- Three Firing Modes-Dividual Firing, Interval Firing & Stepper Firing 12 modules 284 cues at most. Just do you like.
- Flow heavy current more than 10 ampere 9-27VDC, can fire almost all types of igniter / ematch.
- Low power indication. Short warning to avoid harm to body. Extendable to be a slave unit of High Grade System.

MS32Q (individual) : € 259,90 | MS32QS (individual + interval) : € 279,90 | MS32Q+ (individual + stepper firing) : € 296,45 | MS32Q (module) : € 219,90

rfRemotech MS Wireless Firing System is a new 12 cue system, was designed and manufactured with many advanced technologies:

- Optimized Power Supply solution;
- MosFets for output;
- Special rfRemotech Overload Protection;
- Better RF antenna;
- Better Learning code and clear code functions;
- ID visible;

MS12Q : € 109,90

MS12QS : € 129,90

MS12module : € 89,90

MS12Q/QS firing systems

AlphaFire 1Q & 4Q

AlphaFire 1Q (one channel system)

Wireless Radio Firing System | Advanced Output Solution, the firing module will | not burn out even when terminals are shorted! | For Fireworks Pyrotechnical Display | Steady, Reliable, Easy to be used

AlphaFire 4Q (four channel system)

Wireless Radio Firing System | Advanced Output Solution, the firing module will | not burn out even when terminals are shorted! | For Fireworks Pyrotechnical Display | Steady, Reliable, Easy to be used
